

JESÚS SABROSO CENTELLA

Senior Front-End & Mobile Engineer | Freelance

Málaga, Spain | jscentella@gmail.com
linkedin.com/in/jesus-sabroso

PROFESSIONAL SUMMARY

Front-End and Mobile Engineer with over 10 years of software development experience, building web applications and mobile products with React, React Native and TypeScript. Experienced in owning front-end architecture, delivering accessible interfaces and integrating native mobile functionality. Combines hands-on product development with automated testing, mentoring and close collaboration with design, QA and back-end teams.

TECHNICAL SKILLS

Web: React, TanStack, Next.js, Angular, Vue.js, HTML, CSS, Tailwind CSS, SCSS

Mobile: React Native, Expo, NativeWind, Swift and Kotlin integrations, EAS

Languages & APIs: TypeScript, JavaScript, REST APIs

Testing: Cypress, Playwright, Jest, React Testing Library

Practices & tools: Git, Agile/Scrum, accessibility (WCAG), code reviews, mentoring

Additional experience: Node.js, Express, NestJS, SQL, Oracle, Java/J2EE

PROFESSIONAL EXPERIENCE

Freelance Front-End & Mobile Engineer

Self-employed | Sep 2025 - Present | Product: holiday.com

Development of the holiday.com mobile app and user portal, with ongoing migration to XVmobile. Worked within a team of three front-end and three back-end developers.

- Built the user portal from scratch as the sole front-end engineer, owning its architecture and working closely with a back-end developer. Used React, TypeScript, TanStack and Tailwind CSS, with the stack selected collaboratively across teams.
- Developed features across the existing mobile app using React Native, Expo, TypeScript and NativeWind; helped deliver the redesigned app in less than one month.
- Collaborated on native Swift and Kotlin integrations to automatically sign users in when reopening the app, based on their previous session.
- Independently implemented offline-mode handling and migrated static assets to a content delivery network (CDN).
- Contributed to increasing automated test coverage to approximately 98% across the applications and participated in mobile deployments through the existing EAS workflow.

PROFESSIONAL EXPERIENCE (CONTINUED)

Front-End Engineer

One Beyond | Jun 2021 - Sep 2025 | Málaga, Spain

- Designed and implemented scalable front-end solutions with Angular, React and Next.js, supporting enterprise requirements and evolving product needs.
- Contributed to a white-label messaging platform with customizable branding for deployment across multiple clients.
- Mentored developers through code reviews, pair programming and career guidance, supporting technical development and internal progression.
- Developed and maintained automated tests with Cypress, Playwright, Jest and React Testing Library, collaborating with UX/UI, QA and back-end teams in Agile environments.

Front-End Developer

The Cocktail | Dec 2018 - Jun 2021 | Málaga, Spain

- Built and optimized enterprise web applications using React, Vue.js, Redux and Vuex.
- Implemented accessible, responsive interfaces aligned with design guidelines and integrated REST APIs.
- Contributed to sprint planning, estimation and retrospectives within Agile Scrum teams.

Front-End Developer

ONCE Group | Aug 2017 - Dec 2018 | Málaga, Spain

- Developed accessible applications aligned with WCAG standards, supporting users with visual and other disabilities.
- Built responsive interfaces with Angular 5, Bootstrap and SCSS; integrated REST APIs in collaboration with Node.js and Express back-end developers.
- Participated in QA cycles to validate accessibility and application performance.

Back-End Developer

GlobalTMS | 2014 - 2016 | Madrid, Spain

- Developed features and resolved defects in Java/J2EE applications using Oracle, WebSphere Application Server, Struts, Spring and Hibernate.
- Managed Oracle and SQL databases, supporting data integrity, performance and availability.
